

At eTakeoff our specialty is electronic Quantity Takeoff. There are thousands of contractors in every construction trade who use eTakeoff daily to boost their productivity by as much as 15 times over paper takeoff! eTakeoff incorporates sophisticated Assembly capabilities and even has a patented symbol search feature (Auto-count), yet it is one of the easiest to use Takeoff tools on the market. Software Advice awarded eTakeoff an Industry Award, stating it is “one of the best designed construction takeoff UIs on the market.” The combination of productivity gains and ease of use prompted McGraw Hill to select eTakeoff for their Construction Dodge Plan Rooms. We encourage you to download eTakeoff and see for yourself why our users have called it “An incredibly powerful and versatile piece of software!”

⬆ BENEFITS

Increased Accuracy

With the ability to measure to thousandths of an inch, you can be confident that your takeoff is perfect.

Increased Productivity

Up to 15 times more productive than paper takeoff.

Reduced Printing Cost

No need to make plan copies during the bid phase.

Reduced Turn Around

Turn out bids in less time allowing you to do those last minute bids and changes.

Sharable and Reviewable

Your takeoff projects can be stored on a server for all users to share and review.
