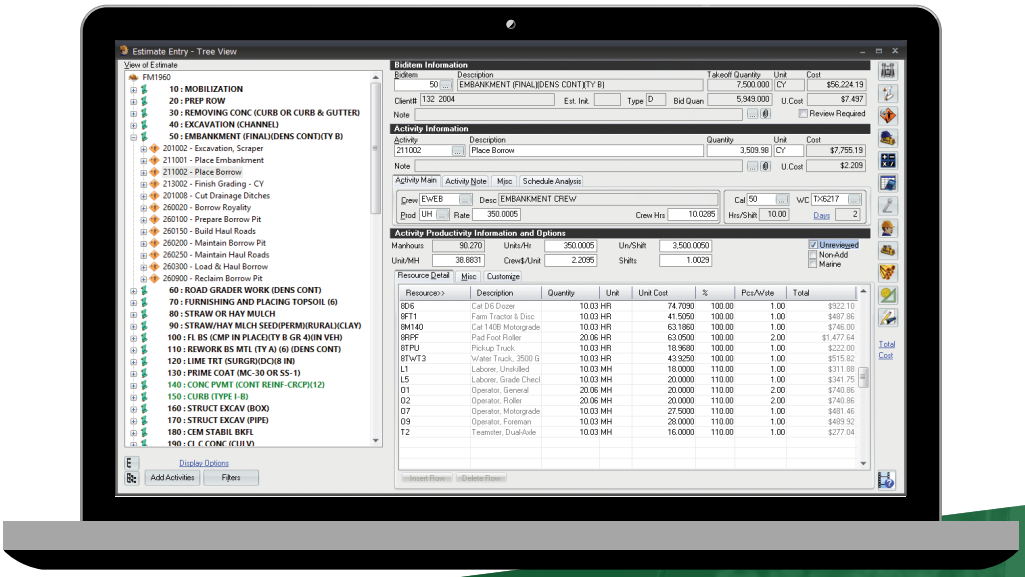
HeavyBid

DESKTOP CLOUD

Powerful, Industry-Leading Construction Estimating Software

HeavyBid is the clear market leader in construction estimating software used by more than 50,000 estimators daily to bid everything from small projects to the largest, most complex, multi-billion-dollar joint ventures in North America.

With three different levels of software and the best trainers and support in the industry, we can help you build a standardized estimating process that makes your company more competitive and allows you to bid more work in less time. **HeavyBid** also streamlines your operations by integrating directly with more than 45 accounting systems, scheduling software, and other **HCSS** software used to run your business.



TOP BENEFITS

Standardize your estimating process and reduce risks and mistakes.

Bid more work in less time with flexible estimating options.

Handle last-minute changes and pick the most advantageous quote on bid day.

Send budgets directly to accounting.

Maximize Your Chances at Winning Bids

Estimate More Work in Less Time

Don't reinvent the wheel on every estimate. Build your bids faster with valuable time-saving features such as multiple estimating data sources, import directly, copy from previous estimates, access to historical estimating and performance data, and integrated RSMeans assemblies. Create custom calculation routines and assemblies to build parts of your estimates automatically. Break larger, complex work into smaller, more manageable and detailed pieces using multi-level breakdowns.

Manage Bid Day Efficiently

Automatically identify the most advantageous quote and save time using automatic pricing calculations to make closing the bid fast and efficient. Create attractive and professional bid forms with completely customizable bid proposals in a number of different formats. **HeavyBid** also interfaces with your existing accounting system, so you can easily send your winning bid right to accounting to create the job budget.

Estimate the Way You Want

HeavyBid's flexible and robust capabilities enable you to handle virtually any bidding situation, from unit price or lump sum bidding to design-build and joint venture projects. Flexible labor and equipment cost methods, cost types, mark-up capabilities, and unit prices let you estimate the way you want, and a versatile work breakdown structure lets you organize your estimate based on what matters most to you.

Use the Industry Standard

More than 50,000 estimators use **HeavyBid** every day, from small contractors to 111 companies on the ENR Top 400 list. With three different levels to fit your organization's size and hosting options to meet any IT department's requirements, **HeavyBid** can grow alongside your company.

Reduce Risks and Minimize Mistakes

No more complex spreadsheets to maintain or broken formulas to fix. **HeavyBid** will help identify potential estimating errors and take you right to them to make corrections, and it will provide a powerful suite of reports to analyze. Easily mark items for review, see the net effect of cost changes, use the audit trail to track edits, and create custom key indicators to compare your estimate against benchmarks.

Interface with Other Software

HeavyBid seamlessly integrates with the other software that is vital to your business, including Primavera, P3, P5, and P6; Microsoft Project; more than 45 accounting systems; Microsoft Excel, Word, and Outlook; and your owners' bidding software, such as state DOTs. Send winning bids directly to your accounting and project scheduling software to prepare budgets and schedules and quickly and easily get set up to perform your work.

HCSS SOFTWARE INTEGRATION

HCSS software is designed to work together to help your business run more efficiently. Data is accessible between products, reducing manual entry and increasing productivity.
