

# Eos NAVIGATOR

## Integration Options

Are you looking for ways to connect estimating with your business-critical systems?

**Eos Navigator integrates seamlessly with other commercial software and tools to optimize the estimating experience.**

Take advantage of our embedded tools to import and export information easily in a variety of ways. With a little planning, you can send your project and estimate data to common file types and share it with others.

If Navigator's embedded tools don't meet your integration needs, contact us to discuss how our extensible integration framework can address them. Examples of mission-critical tasks and processes that Navigator can optimize include:

- Create projects automatically from CRM systems
- Update project information *en masse* from a Microsoft Excel workbook
- Initiate Sage Estimating assembly and item takeoff from an external web form
- Update Sage Estimating estimate items with subcontractor or vendor pricing
- Create schedule activities in Primavera P6 using estimate data
- Publish control estimates to a cost management system during project closeout

### WHAT OUR CLIENTS THINK

*"Eos's data integration service has given Kinsley peace of mind knowing that all project data in Viewpoint, Eos Navigator, and Sage Estimating will be synced on a daily basis – providing the preconstruction team with more time to focus on the details and less time on data entry."* – John Clemons, Kinsley Construction

# EOS NAVIGATOR

## Integration Options

	Options	Capabilities
For everyone	Basic panel functionality	Organize project and estimate collections using sorting, filtering, and grouping options before exporting to Microsoft Excel.
	Basic integration operations	Create or update project, estimate or item data from a structured Microsoft Excel workbook. Or reverse the process to create a new workbook containing exported data.
For system administrators	Custom reports	Design SSRS reports to present customized project or estimate information in .PDF, .XLS, .DOC, and other formats.
	Custom integration operations	Use our data exchange service to configure operations that read/write Navigator and Sage Estimating data to/from .XLS, .XML, MS SQL, Oracle, and other formats.
For developers	Advanced custom integration operations	Use our data exchange service to configure advanced multi-step operations that automatically synchronize data between systems.
	External integration	Use our public SDK to develop unique integration features for your application to share data and perform common operations from outside of Navigator.
	External integration (web services)	Use our public SDK to develop custom integration features for your web-based application to share data and perform common operations from outside of Navigator.

### FOR MORE INFORMATION

Please contact us if you have questions or want to learn more about Eos Navigator's integration options. Call us at 1-866-367-4768, ext. 2 or email us at [support@eosgroup.com](mailto:support@eosgroup.com).

Eos Group is a software development and consulting firm providing customized preconstruction solutions to the Architectural, Engineering, and Construction industry. For more information, go to [www.eosgroup.com](http://www.eosgroup.com) or [info@eosgroup.com](mailto:info@eosgroup.com)
